## IN THE CLAIMS:

- 1. (Currently Amended) Multilayer manufactured articles comprising at least:
  - A) a layer consisting essentially of thermoprocessable copolymers of ethylene with cholorotrifluoroethylene, and/or tetrafluoroethylene, and with acrylic monomers of formula:

$$CH_2=CH-CO-O-R_2$$
 (a)

wherein  $R_2$  is a hydrogenated radical from 1 to 20 carbon atoms, of alkyl, linear or branched type, cycloalkyl type, or H;  $R_2$  optionally contains CI, O, N and/or one or more functional groups selected from –OH, -COOH, epoxide, ester or ether; wherein the (a) monomer amount is in the range of 0.01-15% by moles with respect to the sum of the monomers of ethylene and of CTFE and/or TFE; and

- B) a layer based-on consisting essentially of polyamides having an amount of –NH<sub>2</sub> end groups in the range of 40-300 μeg/g.
- 2. (Original) Multilayer manufactured articles according to claim 1, in which the polyamide of B) contains one or more diamines.
- 3. (Previously Presented) Multilayer manufactured articles according to claim 1, wherein the thermoprocessable copolymers of layer A) are formed by:
  - from 10 to 70% by moles of ethylene;
- from 30 to 90% by moles of a fluorinated monomer selected from tetrafluoroethylene, chlorotrifluoroethylene, or mixtures thereof;

- 2 - Application No.: 10/086,845 Attorney Docket No.: 108910-00057

- from 0.05% to 15% by moles of the acrylic comonomer (a) referred to the sum of the previous monomers.
- 4. (Previously Presented) Multilayer manufactured articles according to claim 1, wherein layer A) is formed by a blend of the copolymers of layer A) and the same copolymers without the acrylic monomer, provided that the blend contains an amount of acrylic monomer (a) in the range 0.01% 15% by moles with respect to the total sum of the monomers of ethylene and of CTFE and/or TFE of the blend.
- 5. (Previously Presented) Multilayer manufactured articles according to claim 1, wherein the polyamides of layer B) are formed by a blend of polyamides having different contents of -NH $_2$  end groups provided that the blend contains an amount of -NH $_2$  end groups higher than 40  $\mu$ eq/g.
  - 6. (Previously Presented) Multilayer manufactured articles comprising at least:
    - A) a layer based on thermoprocessable copolymers of ethylene with cholorotrifluoroethylene, and/or tetrafluoroethylene, and with acrylic monomers of formula:

$$CH_2=CH-CO-O-R_2$$
 (a)

wherein  $R_2$  is a hydrogenated radical from 1 to 20 carbon atoms, of alkyl, linear or branched type, cycloalkyl type, or H;  $R_2$  optionally contains CI, O, N and/or one or more functional groups selected from -OH, -COOH, epoxide, ester or ether; wherein the (a) monomer amount is in the range

- 3 - Application No.: 10/086,845 Attorney Docket No.: 108910-00057 of 0.01-15% by moles with respect to the sum of the monomers of ethylene and of CTFE and/or TFE; and

B) a layer based on polyamides having an amount of  $-NH_2$  end groups lower than 40  $\mu$ eq/g, blended with 0.01-5% by weight of one or more diamines.

7. (Previously Presented) Multilayer manufactured articles according to claim 2, diamines the wherein selected from the group formed by are hexamethylendiaminecarbamate, -dicinnamylidene-1,6 N,N'hexandiamine, dodecyldiamine and decyldiamine, para-xylylendiamine.

8. (Previously Presented) Multilayer manufactured articles according to claim 1, wherein on the top of layer A) a layer A1) is placed based on copolymers of ethylene with chlorotrifluoroethylene, and/or tetrafluoroethylene, not containing the acrylic monomer (a), and/or on the top of layer B), a layer B1) is placed based on polyamide having an amount of -NH<sub>2</sub> end groups lower than 40μeq/g.

9. (Previously Presented) Multilayer manufactured articles according to claim 1, in the form of sheath-core fibers.

10. (Previously Presented) Fuel lines formed by multilayers according to claim 1, wherein at least the internal layer in contact with the liquid fuel is made conductive by incorporation of graphite and/or carbon black.

- 4 - Application No.: 10/086,845

Attorney Docket No.: 108910-00057

11. (Previously Presented) Multilayer manufactured articles according to claim 1, wherein the layer based on polyamides has an amount of –NH<sub>2</sub> end groups in the range

of 45-150  $\mu$ eq/g.

12. (Previously Presented) Multilayer manufactured articles according to claim

3, wherein the thermoprocessable copolymers of layer A) are formed by 35 to 55% by

moles of ethylene.

13. (Previously Presented) Multilayer manufactured articles according to claim

3, wherein the thermoprocessable copolymers of layer A) are formed by 45 to 65% by

moles of a fluorinated monomer selected from tetrafluoroethylene,

chlorotrifluoroethylene, or mixtures thereof.

14. (Previously Presented) Multilayer manufactured articles according to claim

3, wherein the said fluorinated monomer is chlorotrifluoroethylene (CTFE).

15. (Previously Presented) Multilayer manufactured articles according to claim

3, wherein the acrylic monomers comprise n-butylacrylate.

16. (Previously Presented) Multilayer manufactured articles according to claim

6, wherein layer B) is blended with 0.1-2% by weight of one or more diamines.

Attorney Docket No.: 108910-00057
